

XM-WIE WINDER INTERLOCK - WALL MOUNT

PRODUCT DETAILS

The winder interlock locks out the winder allowing artisans to work safely while doing maintenance.

- Direct drive operation - positively opens contacts
- The standard sequence is: Key trapped (But not locked)
- Special switch ratings and/or contact arrangements available on request
- Consists of 5 X key switches and keys

PRODUCT CODE:	PART NO.	DESCRIPTION:
3513.08	XM-WIE	Winder Interlock - Wall Mount

SEQUENCE OF OPERATIONS

All five keys are trapped (but not locked) into the winder interlock.

Each keyswitch operates independantly and is fitted with a 2NO / 2NC Switch.

When any key is removed, the switch will trip the Winder.

All keys need to be returned and inserted into each respective lock in order for the winder to be restarted.
