

XM-WIE WINDER INTERLOCK - WALL MOUNT

PRODUCT DETAILS

The winder interlock locks out the winder allowing artisans to work safely while doing maintenance.

- Direct drive operation - positively opens contacts
- The standard sequence is: Key trapped (But not locked)
- Special switch ratings and/or contact arrangements available on request
- Consists of XM5, SWA and one switch

PRODUCT CODE:	PART NO.	DESCRIPTION:
3513.04	XM-WIE	Winder Interlock - Wall Mount

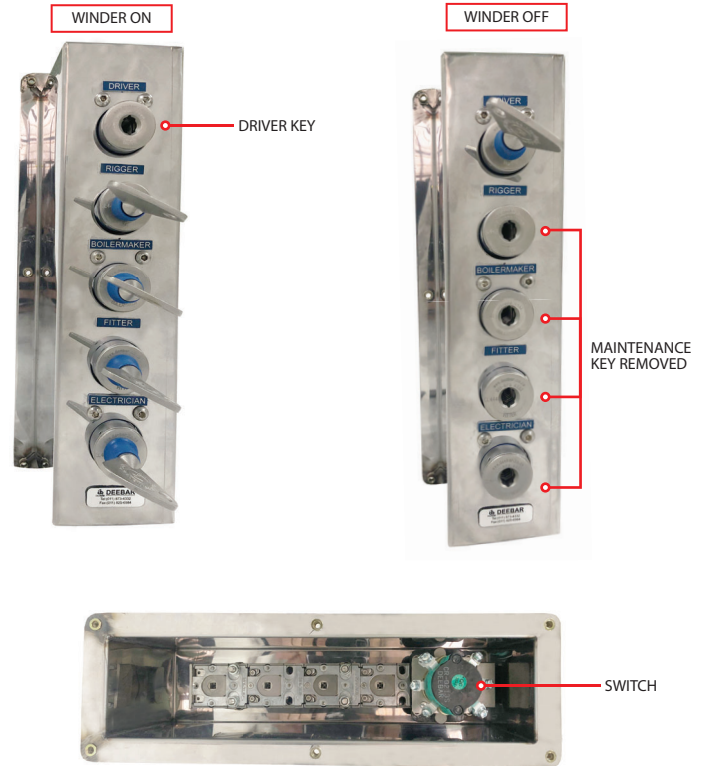

SEQUENCE OF OPERATIONS

The Driver Key must be inserted into the Winder Interlock. Once inserted, the Switch will trip the Winder.

The four trapped keys can now be removed by the responsible person. The Driver Key will remain trapped until the missing four keys are returned.

Once all keys have been returned, the Driver Key can be removed and the Winder can be restarted.
