

QUALITY POLICY STATEMENT

Deebar designs and manufacture products for the mining, power generation, motor, petro-chemical and pharmaceutical industries, and we strive to provide innovative and diversified products to meet the changing climate in the countries in which our products are used.

We are committed to ensuring that the products meet their intended purpose and performance criteria, in conformance with the requirements, expectations and needs of our customers and the applicable statutory and regulatory requirements where the products are used.

To attain this objective, we the undersigned Directors are committed to ensuring that the **Quality Management System** is documented, implemented, maintained and will be continually improved by regular reviews of the suitability, adequacy and effectiveness of the systems, through monitoring, measuring, analysis and evaluation of the system performance, including the setting and reviewing quality objectives.

This quality policy will be communicated and understood within the company, as well as being communicated to all persons working on behalf of Deebar, including relevant interested parties, and will be available to these relevant interested parties, as appropriate, on request.

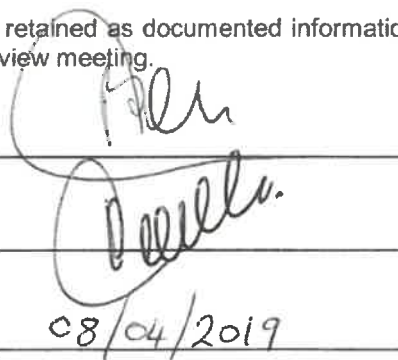

In the fulfillment of the above policy requirements we shall assign adequate resources required by the Quality Management System and shall ensure that personnel are competent to perform their duties with excellence.

This policy statement will be retained as documented information and will be reviewed for continuing suitability during every management review meeting.
